

Version 4.7.7

Release date: February 6th, 2024

New functionality.

BIBLIOTEKKORTET

Libraries in Norway can integrate against the Bibliotek Kortet solution provided by the National library. With this integration patrons can authenticate using their National Id:s. Contact Axiell if you want to know more about the integration.

GOOGLE MAP

It is now possible to disable the Google map in the Branch information. This is done by unchecking a checkbox, "Show map" in the branch article. By default the checkbox is checked.

PAYMENT PROVIDERS

New payment provider, Paytrail added for the Finnish market. Contact Axiell if you want to know more about the integration.

FREJALD

Libraries in Sweden can now let patrons log in to Arena using Frejald. Customers using the Agreement module in Quria can also let patrons sign agreements in Arena using Frejald. Contact Axiell if you want to know more about the integration.

Improvements & Fixed bugs

ACCESSIBILITY, USER INTERFACE AND STYLING

- On some mobile devices there has been an issue with the event registration button not being displayed correctly. This is now fixed.
- Issues with styling of the event registration and *Load more* buttons have been fixed.
- The styling of the checkbox in *My reservations* have been improved
- The issue with patrons not being able to set inactive email addresses as active is now solved.
- The issue with the facet/filter button not being displayed on mobile devices when sorting of search result is disabled is now solved.
- A missing linebreak in the notes field in the catalogue record is added.

PAYMENTS

- Revenue code is now mapped from the backend to the provider HeyCentric (UK) and can be shown in the providers admin reports. (Existing customers have been hotfixed with the solution.)
- Issues with endpoints for ITEOS/ePay (Germany) is now solved.

COOKIE CONSENT

- The Reject all button in the cookie consent panel has been changed to Accept necessary to be in line with the usability.

ID PORTEN

- Integration against ID Porten (Norway) has been updated. Contact Axiell if you want to know more about the integration.

Known issues

The following issues are known at the time of the release.

- Signing agreements with Frejald might in some rare occasions result in users seeing a blank page. The agreement still gets signed.
- Only one time zone can be used for opening hours which means that for example different US locations will show the same time (according to the time zone in the Google calendar settings)
- When registering to an event several times with the same email address, a previous registration is deleted.
- It is not possible to make reservations between midnight and the time zone offset in time zones that differ from UTC, for example between 0:00 and 02:00 in the Eastern European Time Zone (UTC +02:00). (SR00064044)
- Reservations created after 18:00 (CET) cause reservation "from-date" to become "tomorrow".
- When adding content to the Web content display portlet, it is not possible to search for content. (SR00060361)
- You can currently not request a new PIN code via SMS. Only the email option is available. (SR00060174)
- The total number of specified participants is shown for events, not the number of seats still available. This may cause users to believe that they can register more attendees than possible.
- When placing a reservation from the Media list, the pre-selected pickup branch is not recognized, and you must select the pickup branch once more. (IN00053736/SR00054146)
- There is no confirmation email sent when registering for an event.
