

# Version 4.7.5

For some new pieces of functionality in this release, a few texts in the user interface may be displayed in English even when another language is selected.

Release date: June 15, 2023

## New functionality

### SELF-REGISTRATION

New functionality that allows the administrator of Arena to decide if a newly registered patron should be automatically logged in or not. By default all newly registered patrons are logged in but this can now be changed by checking the checkbox: "Disable automatic login upon completion of self-registration".

New functionality that makes it possible to send an e-mail containing the patron log in credentials via e-mail. The e-mail is sent to the e-mail address that the patron adds in the form. Check the checkbox "Enable sending of an email containing login credential" to activate the functionality.

### RESULTS LIST

Installations running Arena Nova will now be able to display author and title in the results lists portlet used for horizontal dynamic lists and toplists. Make sure author and title is active under "Library records: fields". To avoid having duplicate links make sure cover is set as link under 'Library records: page components' and title is not as link.

## Fixed bugs

### ACCESSIBILITY, USER INTERFACE AND STYLING

- Texts in the user interface as well as error messages are continuously updated and improved for all languages.
- Admin moderation for reviews now shows the title for "Review for authorisation".
- "We offer"-articles has an updated link functionality. Now the link says "Read more". Screen readers still read "Read more and article name".
- Various styling fixes for Agreements.
- Many fixes have been made regarding accessibility, for example:
  - Accessibility improvements for several portlets, for example, Events, Log in, Results list, My Wishlist, Search result and Catalogue Record detail.
  - Labels for graphical elements and locations
  - Error messages read by screen readers

## PERFORMANCE

When using “Named lists” (lists created in the backend), in the Results list portlet, the search is now cached for 4 hours to improve performance. Editing or adding a new results list portlet will trigger a new search before caching.

## PAYMENTS

- Issues with online payments not being removed from the backend are now fixed.

## PRINT-OUTS

- Previously, when printing a list from the search result, some fields were missing. This is now fixed. (SR00157623)

## FOOTER

In Arena Nova it is now possible to add more than one logo in the footer article.

## COOKIES

The users of Arena are now forced to accept or deny cookies.

## OPENING HOURS

The user interface of **Opening hours** has been updated:

- In the opening hours card the link now reads “View all opening hours”. Screen readers still reads “View all opening hours + Branch name”.

## Known issues

The following issues are known at the time of the release.

- Only one time zone can be used for opening hours which means that for example different US locations will show the same time (according to the time zone in the Google calendar settings)
- When registering to an event several times with the same email address, a previous registration is deleted.
- It is not possible to make reservations between midnight and the time zone offset in time zones that differ from UTC, for example between 0:00 and 02:00 in the Eastern European Time Zone (UTC +02:00). (SR00064044)
- Reservations created after 18:00 (CET) cause reservation "from-date" to become "tomorrow".

- When adding content to the Web content display portlet, it is not possible to search for content. (SR00060361)
- You can currently not request a new PIN code via SMS. Only the email option is available. (SR00060174)
- The total number of specified participants is displayed for events, not the number of seats that are still available. This may cause users to believe that they can register more attendees than possible.
- When placing a reservation from the Media list, the pre-selected pickup branch is not recognized, and you have to select the pickup branch once more. (IN00053736/SR00054146)
- There is no confirmation email sent when registering for an event.
